SOFTWARE ENGINEERING LAB 2

Project: Podcast Guest Scheduling & Outline Builder

Project Key: PGSOB

SRN: PES1UG25CS812

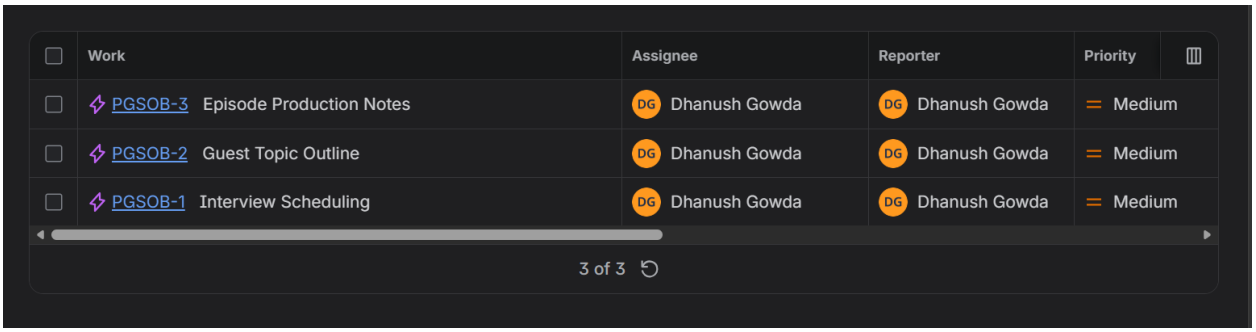

Jira Board: PGSOB Board

Workspace: https://dhanush63639.atlassian.net

1. Epics & User Stories

Epics:

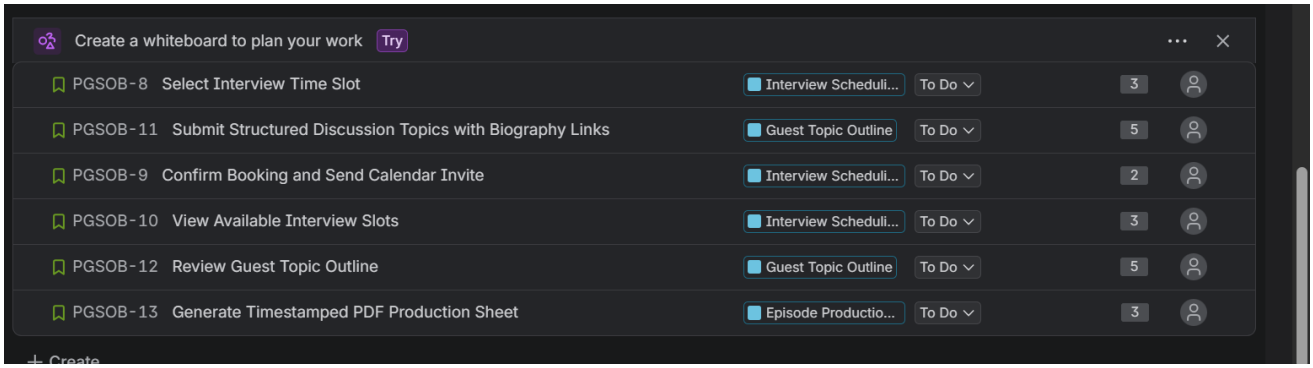

- Interview Scheduling
- Guest Topic Outline
- Episode Production Notes

User Stories: 6 stories, 21 total Story Points

Issue	User Story	Story Points	Epic
PGSOB-8	Select Interview Time Slot	3	Interview Scheduling
PGSOB-9	Confirm Booking and Send Calendar Invite	2	Interview Scheduling
PGSOB-10	View Available Interview Slots	3	Interview Scheduling
PGSOB-11	Submit Structured Discussion Topics with Biography Links	5	Guest Topic Outline
PGSOB-12	Review Guest Topic Outline	5	Guest Topic Outline
PGSOB-13	Generate Timestamped PDF Production Sheet	3	Episode Production Notes

Total: 21 Story Points

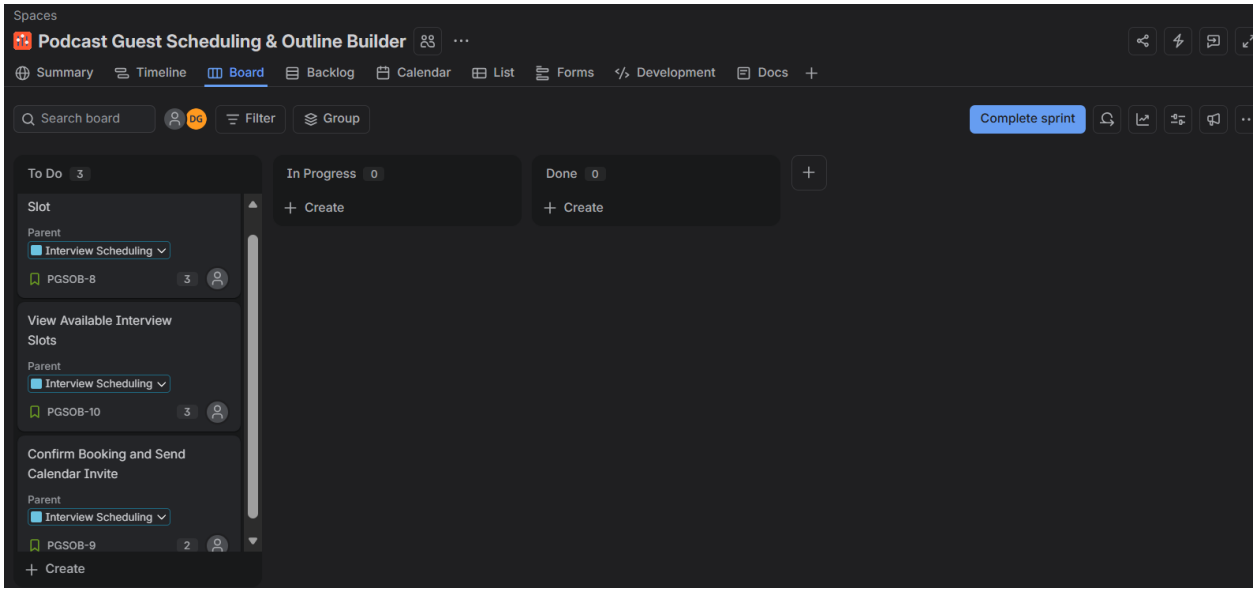

2. Sprint 1

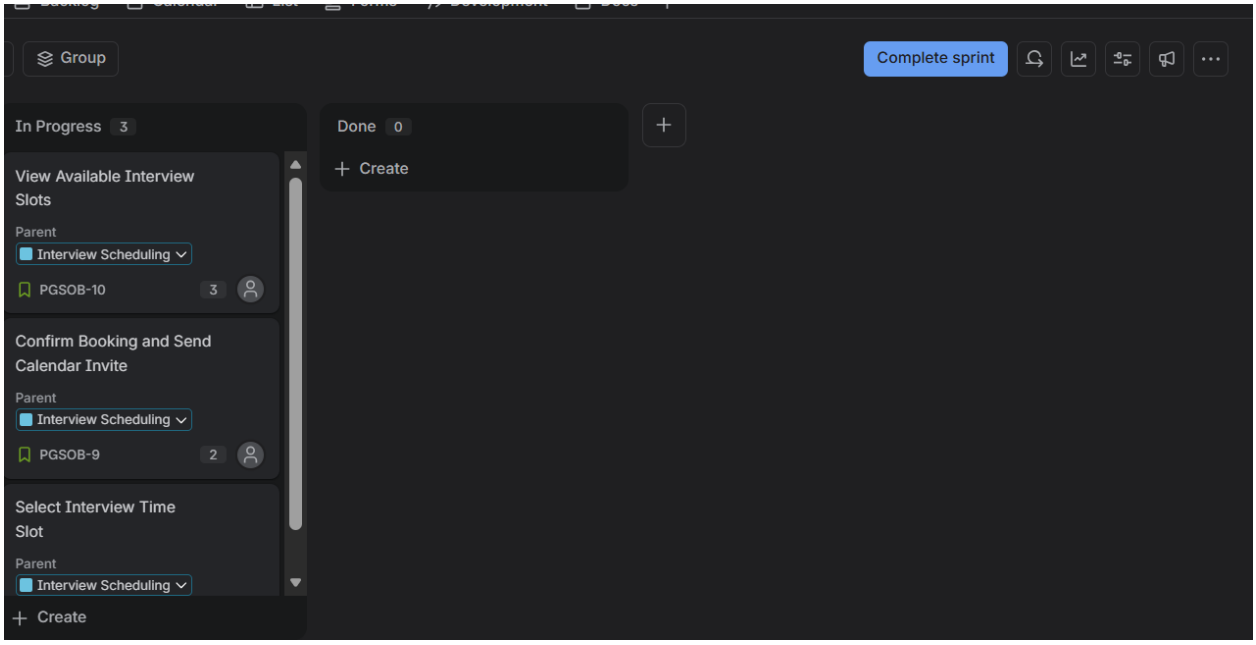

8 Story Points — 3 stories completed

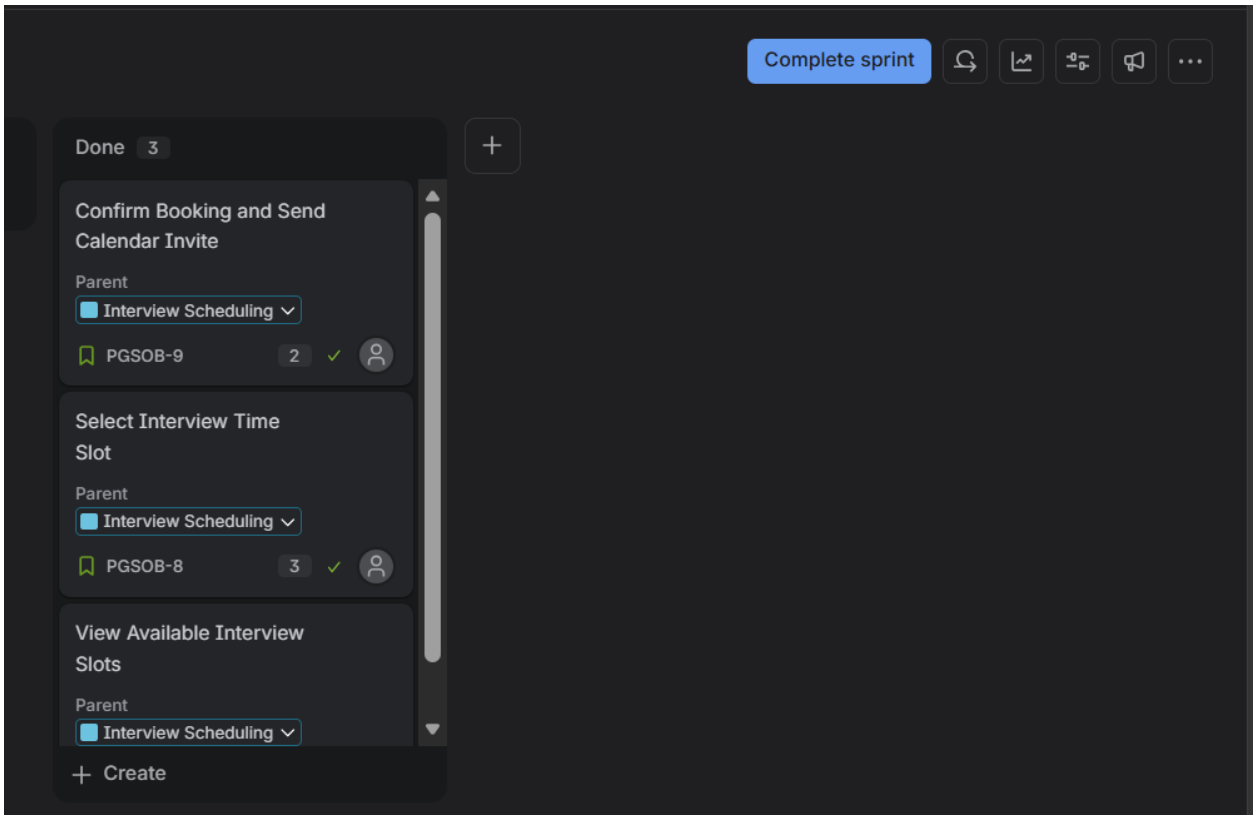

Sprint 1 Stories:

- PGSOB-10 — View Available Interview Slots — 3 SP
- PGSOB-8 — Select Interview Time Slot — 3 SP
- PGSOB-9 — Confirm Booking and Send Calendar Invite — 2 SP

Sprint Goal: Complete the interview scheduling and booking functionality, including viewing available slots, selecting an interview time, and confirming the booking with a calendar invite.

3. Sprint 2

13 Story Points — 3 stories completed

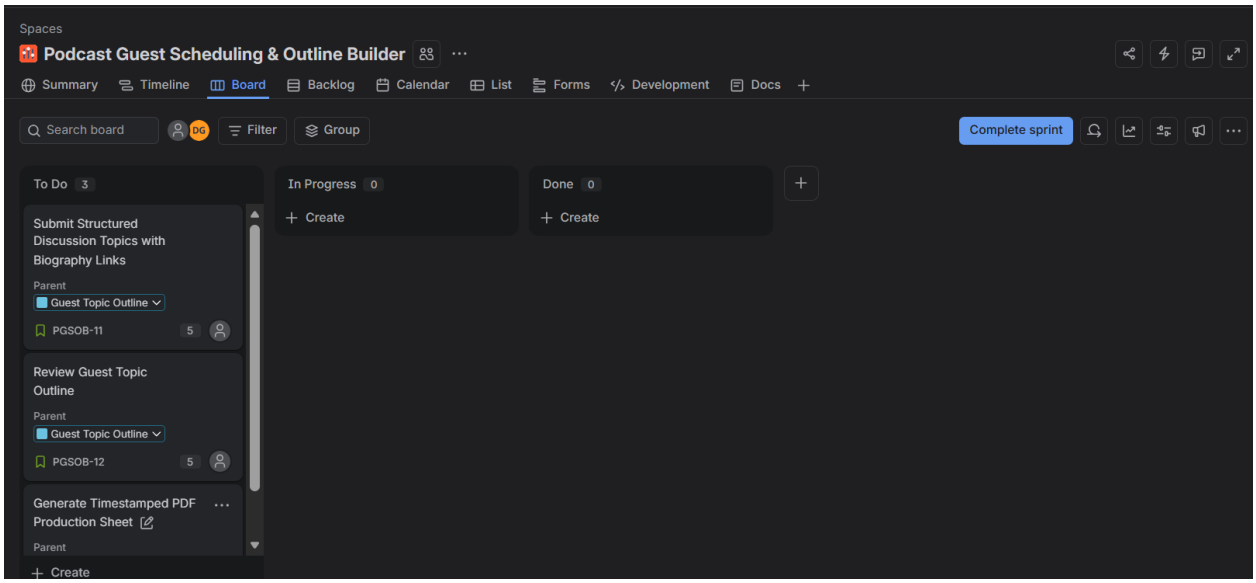

Sprint 2 Stories:

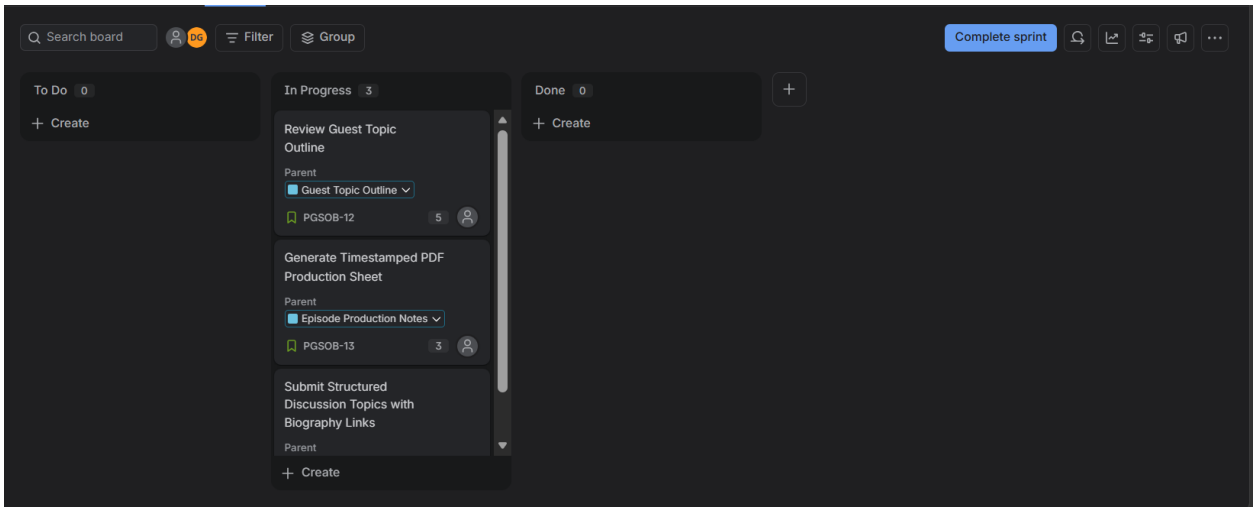

- PGSOB-11 — Submit Structured Discussion Topics with Biography Links — 5 SP
- PGSOB-12 — Review Guest Topic Outline — 5 SP
- PGSOB-13 — Generate Timestamped PDF Production Sheet — 3 SP

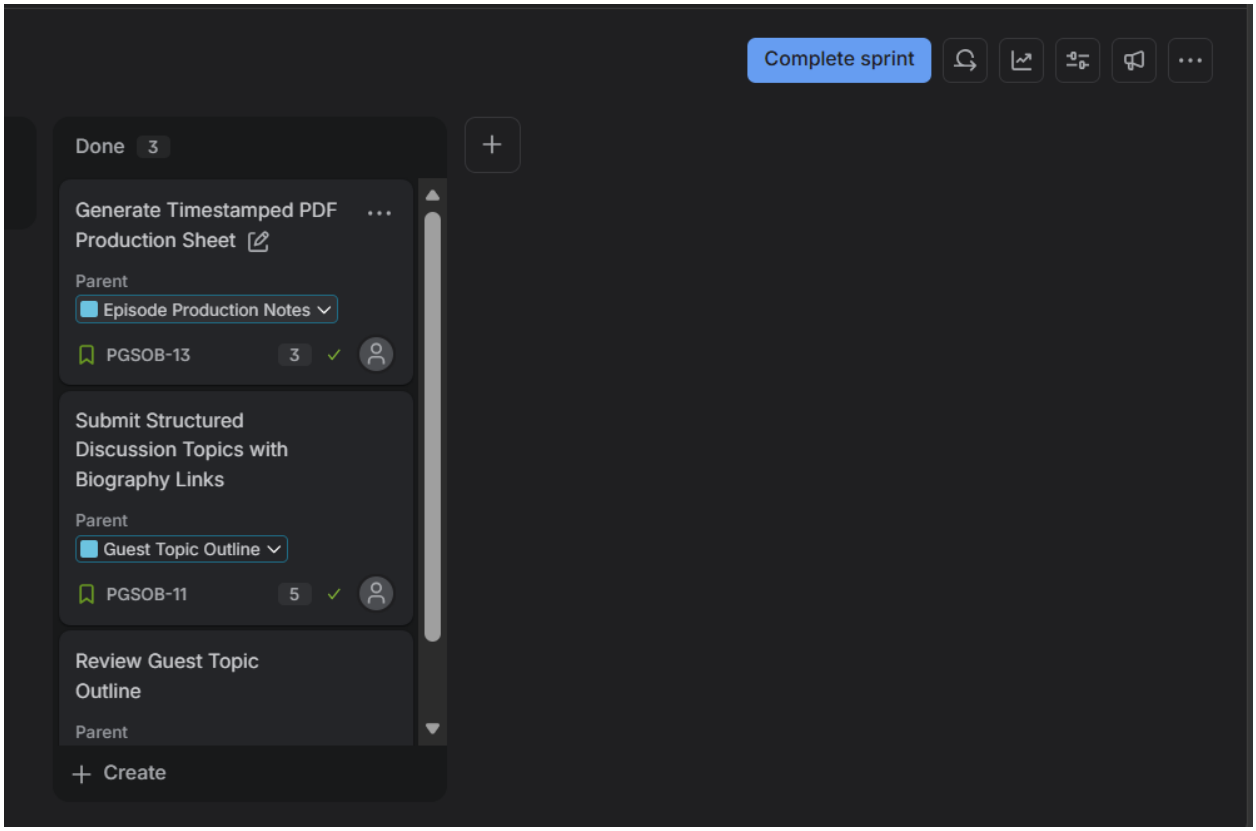

Total: 13 Story Points

Sprint Goal: Complete guest topic outline management and generate the timestamped PDF production sheet for episode production.

Jira execution evidence: The uploaded Jira screenshots document the PGSOB backlog and Sprint 1 configuration. A final PGSOB Sprint 2 board screenshot should be added after Sprint 2 is completed.

4. Burndown Chart

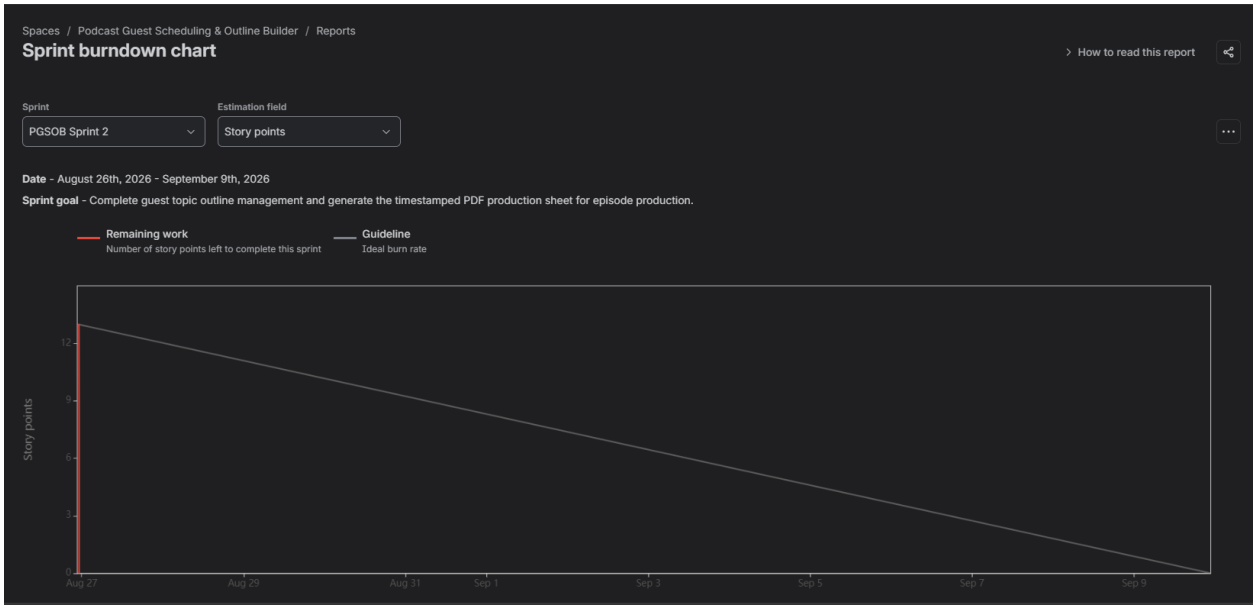

Sprint: PGSOB Sprint 2

Initial Work: 13 Story Points

Completed Work: 13 Story Points

Remaining Work: 0 Story Points

The burndown chart represents the progress of Sprint 2 for the Podcast Guest Scheduling & Outline Builder system. The sprint starts with 13 story points and the remaining work decreases as the assigned user stories are completed. At the end of the sprint, all planned work should be completed and the remaining workload should reach zero.

5. Reflection

1. Estimation:

Story points were assigned based on the relative effort and complexity of each user story. Smaller scheduling activities were estimated at 2–3 points, while topic management and production-related activities were estimated at 5 points.

2. Prioritization:

Interview scheduling and booking functionality was handled first because it forms the basic workflow for arranging podcast interviews. Guest topic management and production-note generation were handled in the second sprint.

3. Sprint:

Both sprints followed the planned scope. Sprint 1 contained 8 story points and Sprint 2 contained 13 story points. The six planned user stories were assigned across the two sprints.

4. Burndown:

The burndown chart shows remaining work and sprint progress over time. As user stories are moved from To Do to In Progress and finally to Done, the remaining story points decrease.
